☐ any table(s) related to the sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-7</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-7</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-7</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: US 5892919 A
D2: US 6092100 A
D3: WO 0197081 A1

D1 relates to a computer apparatus at a proxy server or an internet service provider, which comprises a cache. The cache stores misspelled and other incorrect network addresses and associated correct network addresses (abstract).

A HTTP GET command for a URL is issued by a user. Before or a GET command is sent to a network, which provides connection connections to the desired server, or after the server is not found, a spell-check process is performed, (column 5 lines 48- 61 and figure 5). The URL issued by the user is compared to entries in the cache. If a match is found, the correct URL is issued. If no match is found the GET command is issued unchanged.

D2 describes a server database associated with an internet service provider. The database contains lexicon of IP addresses. If a URL is entered incorrectly at a Web client, the database is searched for a match.

D3 relates to providing network communication between a product supplier and potential buyer.

Reasoned statement

None of the cited documents reveals that that successful identification of a request service is stored in a memory. This information is used to correct errors in service requests. Thus, the invention solves the problem of incorrect service request in a different way than e.g. D1 which stores incorrect service requests which has been successfully corrected.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed invention according to claims 1-7. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-7 is novel and is considered to involve an inventive step. The invention is industrially applicable.
